LinkedIn | GitHub | Portfolio | LeetCode

Professional Summary

Backend engineer experienced in designing modular REST APIs and distributed services using Node.js, Express, and Python frameworks including FastAPI and Flask. Proficient in relational data modeling with PostgreSQL and Prisma, query optimization, and latency reduction through Redis caching layers and Docker containerization. Builds secure backend architectures incorporating token-based authentication and fine-grained role-based access control.

Technical Skills

Backend & APIs: Node.js, FastAPI, Flask, NestJS, Express.js
Databases & ORMs: PostgreSQL, Redis, MongoDB
Languages: Python, TypeScript, JavaScript
Cloud, DevOps & Systems: Docker, Git
Frontend & Web: Next.js

Technical Projects

Product Data Explorer **GitHub**

TypeScript, NestJS, Next.js, PostgreSQL, TypeORM, Docker

- Engineered a modular NestJS backend utilizing TypeORM and PostgreSQL persistence, integrating a Redis caching layer to accelerate query response times.
- Containerized multi-service architecture using Docker Compose and established OpenAPI documentation alongside automated GitHub Actions continuous delivery.
- Architected full-stack product exploration platform leveraging Next.js 14 and Tailwind CSS with server-side rendering for catalog browsing.

Collaborative Task Manager **GitHub**

TypeScript, Next.js, Express.js, Prisma ORM, PostgreSQL, Node.js

- Engineered high-performance RESTful CRUD APIs using Node.js and Prisma ORM, optimizing complex PostgreSQL queries to support real-time platform updates.
- Implemented JWT-based authentication and fine-grained Role-Based Access Control (RBAC) using Express.js and TypeScript to enable secure multi-user collaboration.

AI-Powered Code Review Assistant **GitHub**

Python, FastAPI, Flask, OpenAI API, Git

- Engineered an automated code analysis service using Python, FastAPI, and Flask to inspect pull requests and detect code anti-patterns.
- Implemented rule-based validation mechanisms in Python to detect security vulnerabilities, code smells, and syntax issues across pull requests.
- Configured Git and GitHub webhook integrations to post automated review feedback directly onto code changes.

Professional Experience

Full Stack Developer Intern — FTV Saloon Jun 2024 – Sep 2024

Remote | Internship

- Developed a secure authentication system featuring role-based access control (RBAC) and specialized admin dashboards.
- Designed and implemented robust RESTful APIs for core salon operations, ensuring reliable data consistency.
- Optimized critical backend database queries and frontend asset loading, resulting in a 40% reduction in page load time.

Education

Bachelor of Technology in Electronics Engineering Aug 2021 – Jul 2025

Rajkiya Engineering College | Sonbhadra, India

Relevant Coursework: Data Structures & Algorithms, Python, C, System Modeling, Operating Systems, DBMS, Computer Networks

Grade: 7.5 CGPA

Languages

English (Professional), Hindi (Professional)
