Professional Summary

Software engineer experienced in developing full-stack web applications and modular backend services using TypeScript, Node.js, Next.js, and Python. Demonstrates hands-on capability in architecting RESTful APIs, managing PostgreSQL databases with Prisma and TypeORM, and integrating Redis caching alongside role-based access control. Skilled in containerizing multi-tier environments using Docker and automating development workflows with Git and GitHub Actions.

Technical Skills

Languages: TypeScript, Python, JavaScript
Backend & APIs: Node.js, FastAPI, NestJS, Express.js, Flask
Cloud, DevOps & Systems: Docker, Git
Frontend & Web: Next.js, React
Databases & ORMs: PostgreSQL, Redis

Technical Projects

Product Data Explorer **GitHub**

TypeScript, NestJS, Next.js, PostgreSQL, TypeORM, Docker

- Architected a full-stack product explorer utilizing Next.js 14 and Tailwind CSS with server-side rendering to enable catalog browsing.
- Engineered a modular NestJS backend utilizing TypeORM, PostgreSQL persistence, and a Redis caching layer to accelerate query response times.

Collaborative Task Manager **GitHub**

TypeScript, Next.js, Express.js, Prisma ORM, PostgreSQL, Node.js

- Engineered a full-stack task management platform using TypeScript, Next.js, and Express.js, implementing JWT authentication and role-based access control (RBAC) to ensure secure collaboration.
- Designed and implemented RESTful CRUD APIs using Node.js and Prisma ORM, optimizing PostgreSQL queries to support real-time updates and responsive data retrieval.

AI-Powered Code Review Assistant **GitHub**

Python, FastAPI, Flask, OpenAI API, Git

- Engineered an automated code analysis tool using Python, FastAPI, and Flask to inspect pull requests and detect code anti-patterns.
- Implemented rule-based validation mechanisms to detect security vulnerabilities, code smells, and syntax issues within pull requests.

Professional Experience

Full Stack Developer Intern — FTV Saloon Jun 2024 – Sep 2024

Remote | Internship

- Designed and implemented robust RESTful APIs for core salon operations, ensuring reliable data consistency.
- Optimized critical backend database queries and frontend asset loading, resulting in a 40% reduction in page load time.

Education

Bachelor of Technology in Electronics Engineering Aug 2021 – Jul 2025

Rajkiya Engineering College | Sonbhadra, India

Relevant Coursework: Data Structures & Algorithms, Python, C, System Modeling, Operating Systems, DBMS, Computer Networks

Grade: 7.5 CGPA

Languages

English (Professional), Hindi (Professional)
