# Vishwanath Nishad

**Backend Engineer**

+91 7905087928 | Gorakhpur, India | vishwanatnishad@gmail.com

LinkedIn | GitHub | Portfolio | LeetCode

## Professional Summary

Backend engineer experienced in designing modular RESTful APIs and services using Node.js, Python, FastAPI, and Flask. Implements data-driven architectures leveraging PostgreSQL, Prisma ORM, and TypeORM, integrating Redis caching layers and fine-grained role-based access control to maintain high data consistency and query performance. Experienced in containerizing microservices with Docker Compose and establishing automated deployment workflows using GitHub Actions.

## Technical Skills

**Backend & APIs:** Node.js, FastAPI, Flask, NestJS, Express.js
**Databases & ORMs:** PostgreSQL, Redis, MongoDB
**Languages:** Python, TypeScript, JavaScript
**Cloud, DevOps & Systems:** Docker, Git
**Frontend & Web:** Next.js

## Technical Projects

**Product Data Explorer** **GitHub**

*TypeScript, NestJS, Next.js, PostgreSQL, TypeORM, Docker*

- Engineered a modular NestJS backend utilizing TypeORM and PostgreSQL persistence with a Redis caching layer to accelerate query response times.
- Containerized multi-tier application services using Docker Compose and integrated OpenAPI specifications with automated GitHub Actions continuous delivery pipelines.
- Architected a full-stack product catalog explorer utilizing Next.js 14 and Tailwind CSS with server-side rendering for catalog browsing.

**Collaborative Task Manager** **GitHub**

*TypeScript, Next.js, Express.js, Prisma ORM, PostgreSQL, Node.js*

- Designed and implemented RESTful CRUD APIs using Node.js and Prisma ORM, optimizing complex PostgreSQL queries to support real-time updates.
- Architected secure platform access workflows utilizing JWT-based authentication and fine-grained Role-Based Access Control (RBAC) to support multi-user collaboration.

**AI-Powered Code Review Assistant** **GitHub**

*Python, FastAPI, Flask, OpenAI API, Git*

- Engineered automated code analysis tool using Python, FastAPI, and Flask to analyze pull requests and detect code anti-patterns.
- Configured Git and GitHub webhook integration to post automated review feedback directly on code changes.
- Implemented rule-based validation to detect security vulnerabilities, code smells, and syntax issues in pull requests.

## Professional Experience

**Full Stack Developer Intern — FTV Saloon** Jun 2024 – Sep 2024

*Remote | Internship*

- Developed a secure authentication system featuring role-based access control (RBAC) and specialized admin dashboards.
- Designed and implemented robust RESTful APIs for core salon operations, ensuring reliable data consistency.
- Optimized critical backend database queries and frontend asset loading, resulting in a 40% reduction in page load time.

## Education

**Bachelor of Technology in Electronics Engineering** Aug 2021 – Jul 2025

*Rajkiya Engineering College | Sonbhadra, India*

*Relevant Coursework: Data Structures & Algorithms, Python, C, System Modeling, Operating Systems, DBMS, Computer Networks*

Grade: 7.5 CGPA

## Languages

English (Professional), Hindi (Professional)
