Zoë 林

Backend Developer

+1 202 555 0100 · Remote · candidate-9@example.test

Professional Summary

Profile targeting Backend Developer lists PostgreSQL, Node.js. Linked repositories include Synthetic Workflow 1 and Synthetic Workflow 2; repository access does not establish candidate authorship. Candidate-provided claims (not independently verified): Implemented searchable workflow records with validated form inputs and accessible error messages. BSc in Computer Science, Synthetic University 1

Technical Skills

Databases & ORMs: PostgreSQL
Backend & APIs: Node.js
Languages: JavaScript

Technical Projects

Synthetic Workflow 1 GitHub

A documented workflow application with searchable records, form validation, transaction handling and accessible text-based interfaces.

JavaScript, PostgreSQL

- Created database migrations and integration tests for record creation, editing and transaction rollback.
- Implemented searchable workflow records with validated form inputs and accessible error messages.
- Documented installation steps, API usage and the boundaries of the supported local workflow.

Synthetic Workflow 2 GitHub

A documented workflow application with searchable records, form validation, transaction handling and accessible text-based interfaces.

JavaScript, PostgreSQL

- Implemented searchable workflow records with validated form inputs and accessible error messages.
- Created database migrations and integration tests for record creation, editing and transaction rollback.
- Documented installation steps, API usage and the boundaries of the supported local workflow.

Synthetic Workflow 3 GitHub

A documented workflow application with searchable records, form validation, transaction handling and accessible text-based interfaces.

JavaScript, PostgreSQL

- Implemented searchable workflow records with validated form inputs and accessible error messages.
- Created database migrations and integration tests for record creation, editing and transaction rollback.
- Documented installation steps, API usage and the boundaries of the supported local workflow.

Synthetic Workflow 4 GitHub

A documented workflow application with searchable records, form validation, transaction handling and accessible text-based interfaces.

JavaScript, PostgreSQL

- Implemented searchable workflow records with validated form inputs and accessible error messages.
- Created database migrations and integration tests for record creation, editing and transaction rollback.
- Documented installation steps, API usage and the boundaries of the supported local workflow.
