Professional Summary

Backend software developer specializing in Node.js, Express, and PostgreSQL microservices. Built scalable background worker pipelines and documented RESTful API endpoints with integration test coverage.

Professional Experience

Backend Engineering Intern — CloudScale Technologies May 2024 – Aug 2024

San Francisco, CA | Internship

Developed REST API services and optimized relational database queries.

- Engineered Node.js API endpoints for user authentication with JWT token rotation.
- Optimized PostgreSQL database queries and added indexing for transaction logs.
- Wrote automated Jest integration tests achieving 88% test coverage across API routes.

Technical Projects

Distributed Task Queue **GitHub**

Asynchronous job processing system with Redis and Node.js.

TypeScript, Redis, PostgreSQL, Node.js

- Built reliable job queue worker in Node.js with Redis stream consumer groups.
- Implemented exponential backoff retry logic and dead-letter queue handling.
- Added PostgreSQL audit logging for state transitions across 50,000 processed jobs.

REST API Gateway **GitHub**

Lightweight API gateway with rate limiting and caching.

TypeScript, Express.js, Redis

- Implemented token bucket rate limiter in Redis mitigating traffic bursts.
- Configured reverse proxy routing and centralized response headers for client apps.

Technical Skills

Skills: JavaScript, TypeScript, SQL, Node.js, Express.js, REST APIs, PostgreSQL, Redis, Prisma ORM, Git, Docker, Jest

Education

Bachelor of Science in Computer Science Sep 2020 – Jun 2024

University of California | Davis, CA

Relevant Coursework: Data Structures, Database Systems, Operating Systems, Algorithms

Grade: 3.7 GPA

Languages

English (Professional), Gujarati (Native)
