Professional Summary

Data platform engineer with deep expertise in Apache Spark, Terraform, and Snowflake. Built petabyte-scale lakehouse infrastructure and resilient CI/CD pipelines across AWS and GCP environments.

Professional Experience

Senior Data Platform Engineer — Hexagon Data Solutions Mar 2022 – Present

Paris, France | Full time

- Engineered automated dbt and Snowflake data transform pipelines for 4TB daily ingestion.
- Provisioned multi-region AWS EKS clusters and managed infrastructure as code via Terraform.
- Reduced daily batch ETL runtime from 4.5 hours down to 45 minutes with Apache Spark tuning.

Cloud Infrastructure Engineer — Novatech Analytics Sep 2019 – Feb 2022

Lyon, France | Full time

- Designed CI/CD delivery pipelines in GitLab CI and containerized microservices with Docker.
- Maintained 99.99% infrastructure availability across production Kubernetes clusters.

Technical Projects

Streaming Log Lakehouse **GitLab**

Serverless streaming log ingestion into Apache Iceberg.

Python, AWS, Apache Spark, Terraform

- Provisioned serverless AWS MSK Kafka cluster and Spark Structured Streaming jobs via Terraform.
- Implemented schema enforcement and automated compaction on Apache Iceberg tables.

Multi-Cloud Terraform Modules **GitLab**

Open-source reusable Terraform modules for compliant cloud environments.

Go, AWS, Terraform, Google Cloud Platform (GCP)

- Created modular VPC, IAM, and KMS encryption blueprints tested with Terratest in Go.
- Automated security compliance verification with Trivy and Checkov security scanning.

Technical Skills

Skills: Apache Spark, Snowflake, dbt, Airflow, Kafka, AWS, GCP, Terraform, Kubernetes, Docker, Python, SQL, Go, Bash

Education

Master of Science in Data Engineering & Cloud Computing Oct 2017 – Jul 2019

Technical University of Munich | Munich, Germany

Grade: 1.2 (Sehr gut)

Languages

French (Native), English (Professional), German (Intermediate)
